NATURE AND DETAILED DESCRIPTION OF THE PROPOSED ACTIVITY:

The purpose of this project is to enhance existing environmental quality by removing dead trees + detritus and create productive wetland resources. we are requesting removal of dead trees + detritus. Our plan is to chip/mulch the debris and place it on the area in question. we will replace the dead trees with new trees that are sustainable and safe to local fauna. Examples of trees could include but not limited to red maple, nordic pine or river birch. we will maintain and keep any existing non-diseased trees in the area in question. NO heavy equipment will be utilized within 100 feet of the watercourse. In doing so we will renew the wetland with plants + trees that will flourish.
