Mike and Kris: as for the ladder, we will provide a ground ladder that complies with NFA 1931 and of sufficient length to reach the 4th floor windows.

This would most likely be a 50' ladder. At a slope of 75 degrees it would be 12.5' from wall, providing 37.5' of height.

Thank you. John

Kristine/Michael,

Attached revised Floor Plans & Elevations based on the public hearing on 12/1/25. The attached revised drawings will be presented at our continued hearing tonight.

This includes adding another elevator for the building and revising the building elevations to emulate a pitched roof.

The addition of another elevator changes four one bedroom units into four Studio units. Now there are 20 Studios and 51 - 1 BR units.

I have also included the color building elevations and photo of the actual colors proposed for the building.

Should there be any questions please let me know.

Pat
